

NEEMAKAR

10000 ppm (1% E.C.)

[Neem Formulation (Azadirachtin)]

In the modern age of globalisation people have become more conscious about pollution & effects of harmful chemicals on their consumables. Most of the residual chemicals are getting restricted by the developed world. Insects have developed resistance against many chemicals in course of time. Natural Predators & Parasites are rarely visible in the field.

Under such circumstances economic pest

control is a meance & great task for all people engaged in agriculture.

Neem has played a vital role in resisting pest from time immemorial. Neem extract having "Azadirachtin" in it works as a strong antifeedant, insect growth inhibitor, repellent & ovicidal. It acts against more than 200 species of insects & pests.

Neemakar should be applied prior to any possible outbreak of pests from time to time.

Target Pest : All sucking & chewing pests

Helopeltis

Red Spider Mites

Caterpillar

Beetle

Mode of Action

Antifeedant + Insect Growth Inhibitor + Feeding Deterrent + Anti Oviposition + Repellent

Advantages :

1. Very effective in reducing the pest population
2. No residue or taint in end product
3. No insect can develop resistance against it
4. Compatible with conventional, pesticides & fungicides except copper.
5. Safe for natural predators & parasites.

Dosage : 2.5 ml / l (1 l / ha)
